[System Mechanic Pro 18.7.3.176 Crack With Activation Key](https://wiki.mikrotik.com/wiki/Manual:IP/Firewall/L7)

https://wiki.mikrotik.com/wiki/Manual:IP/Firewall/L7

Summary

layer7-protocol is a method of searching for patterns in ICMP/TCP/UDP streams.

Note: The L7 matcher is very resource intensive. Use this feature only for very specific traffic. It is not recommended to use L7 matcher for generic traffic, such as for blocking webpages. This will almost never work correctly and your device will exhaust its resources, trying to catch all the traffic. Use other features to block webpages by URL.
